

Portable EV Car Charger Offering Universal Compatibility with Type 2 and SAE J1772 Plugs for All Major Electric Vehicles

Our Product Introduction

Basic Information

- Brand Name: TIANJIN TOEC HUADIAN TECHNOLOGY CO., LTD
- Model Number: HD-EVE-P-B-7KW

Product Specification

- Output Current: 32A
- Output Power: 7kW
- Input Voltage: 230VAC+15%
- IP Grade: IP65
- Housing Material: PC+ABS
- Cable Material: TPU
- Highlight: Portable EV charger Type 2 compatible,
Universal EV car charger J1772 plug,
Portable electric vehicle charger for all EVs

Product Description

We usually export large quantities to foreign countries. Hope to find more trade partners.

PowerCharge Pro: The Ultimate EV Charging Solution for Every Environment

Introducing PowerCharge Pro—your reliable, high-performance electric vehicle charger designed to deliver efficient, safe, and versatile charging wherever you need it. Engineered with industry-leading standards and built to withstand the toughest conditions, it's the perfect choice for homes, workplaces, and commercial facilities.

Unmatched Performance & Versatility

- Powerful Charging Options: Available in 7.36kW and 9.6kW models, with adjustable output current (6A-32A/40A) to match your EV's needs.
- Global Compatibility: Supports 230VAC±15% input (50/60Hz) with multiple plug options (Schuko, NEMA 5-20P, CEE 3 PIN, NEMA 14-50P) for use worldwide.
- Universal Connection: Equipped with Type 2 and SAE J1772 charging plugs, compatible with all major EV brands.
- Flexible Installation: 5M standard cable (customizable length available) and natural cooling system for easy placement in any location.

Industrial-Grade Safety & Durability

- Comprehensive Protection: Features over-current, over/under voltage, RCD, ground fault, and surge protection to keep you and your vehicle safe.
- Extreme Weather Resistant: IP65 waterproof rating and IK10 impact resistance—operates flawlessly from -25 to +60 .
- Energy Efficient: <3W standby power consumption to reduce energy waste and lower costs.
- Reliable Performance: Works at altitudes up to 2000M and humidity levels from 5% to 95%.

User-Friendly Design & Compliance

- Intuitive Interface: Clear LCD display and LED indicators to show charging status at a glance.
- Globally Certified: Meets strict standards including EN/IEC 61851-1:2019, SAE J1772:2016, and UL 2231:2018, with TUV, CE, ETL, and FCC certifications.
- Long-Term Value: Backed by a 2-year warranty for peace of mind and reliable performance for years to come.
