Elevate Your Tesla Charging Game: Compact, Mighty, Ready

When your Tesla 3/S/X/Y needs a charge, settle for nothing less than an adapter that's built as smart as your ride.

Engineered for Peak Performance

Crank up the charging speed with support for 240V AC (80A max current)—so you spend less time plugged in, more time on the move. And it's tough: rated for -22°F to 122°F operation, it laughs off blizzards and heatwaves alike.

Zero-Fuss Compatibility

Designed exclusively for Tesla 3/S/X/Y Level 1 & 2 charging stations—no confusing adapters or apps. Plug in, lock in, and let it do the work.

Small Size, Big Impact

At just 269g, it's the ultimate travel companion (no bulky gear cluttering your cabin). Need to stock up? Each 50-unit carton (1058260mm inner box; 53.531.521CM outer carton) weighs only 14.35KG—easy to store, easy to restock.

This adapter isn't just a accessory—it's the missing piece of your Tesla's daily routine. Power up smarter, not harder.

EASY TO USE

Method 1

Firmly push the adapter into the charging port

Method 2

Connect the plug to the adapter until you hear a 'click' sound

Method 3

Wait for the indicator light to turn green
