

## Portable EV Car Charger Designed for Easy with Eight Current Settings Real Time Power Monitoring and Compact Lightweight Form Factor

### Our Product Introduction

#### Basic Information

- Brand Name: TIANJIN TOEC HUADIAN TECHNOLOGY CO., LTD
- Model Number: HD-SY2-16S

#### Product Specification

- Output Power: 11kw
- Input Voltage: 110/480V
- Rated Current: 16-50A
- Rated Voltage: 110-480V
- Rated Power: 3.6-22KW
- Temperature: -40 To +55
- Highlight: Portable EV car charger with power monitoring,  
Compact lightweight EV car charger,  
EV car charger with eight current settings

## Product Description

We usually export large quantities to foreign countries. Hope to find more trade partners.

### One-Touch Charging Made Effortless – Because Your Time Matters

Charging your electric vehicle shouldn't feel like solving a puzzle. This portable EV charger is designed from the ground up with one goal in mind: to make every charge as simple, fast, and stress-free as possible.

With just a single button, you can cycle through eight precise current settings—from 6A to 32A—allowing you to match your charging speed to your car's capabilities, your outlet type, or even your schedule. Need a quick top-up before work? Go full power at 32A. Prefer a gentle overnight charge on a standard household socket? Drop it down to 6A or 10A. The flexibility is entirely in your hands.

But simplicity doesn't mean sacrificing insight. A bright, easy-to-read digital display shows real-time data: voltage, current, power output, total energy delivered (in kWh), and estimated time remaining. No guesswork. No confusion. Just clear, actionable information at a glance.

Whether you're plugging in at home, at a friend's driveway, or in a public parking spot, this charger works instantly—no apps, no Wi-Fi, no setup. It's plug-and-play intelligence that respects your time and your peace of mind.

And because it's lightweight and compact, it tucks neatly into your trunk or glove compartment, ready whenever you are. This isn't just a charger—it's your silent co-pilot on every electric journey.

## One-click switch, simple operation

Supports five levels of current charging modes to adapt to different charging conditions, adjustable at will, allowing free selection between fast and slow charging. Adaptable to various vehicle models' current requirements.

6A 8A 10A 13A 16A 20A 24A 32A

## Pre-scheduled timed charging

The control box supports scheduled charging settings for start times, allowing timed entry into charging mode for convenient and worry-free night charging.

8:00 9:00 10:00

Daytime peak rates are more expensive

Nighttime off-peak rates are cheaper

22:00 00:00 8:00
