

Portable EV Car Charger Featuring Compact Design Waterproof Protection and Intuitive Interface for Convenient Charging

Our Product Introduction

Basic Information

- Brand Name: TIANJIN TOEC HUADIAN TECHNOLOGY CO., LTD
- Model Number: HD-SY1-16S

Product Specification

- Output Power: 3.6W
- Input Voltage: 110/240V
- Output Current: 16A
- IP Rating: IP65
- Certifications: FCC
- Highlight: portable EV car charger with waterproof protection
, compact portable EV car charger ,
intuitive interface EV car charger

Product Description

We usually export large quantities to foreign countries. Hope to find more trade partners.

Simple, Safe, and Always Ready – The Charger That Works as Hard as You Do

For most EV owners, charging isn't a special event—it's part of the daily routine. This portable EV charger is designed with real life in mind: no complicated setups, no confusing apps, just reliable power whenever you need it.

Its intuitive interface features a clear LCD screen that shows everything you care about at a glance—voltage, current, charging time, and total energy used—so you never have to guess what's happening. A single button lets you adjust the charging current to match your home outlet, whether you're using a standard 10A socket or a dedicated 32A circuit.

The compact, lightweight design makes it easy to store in a garage, hang on a wall, or toss in the trunk for weekend trips. The 5-meter cable (extendable upon request) gives you plenty of reach—no more awkwardly parking right next to the outlet. And thanks to its IP65-rated waterproof housing, it's perfectly safe to use in rain, snow, or humid conditions, so you never have to wait for perfect weather to charge.

Safety is built in from the ground up. With automatic protections against overheating, overcurrent, leakage, and voltage fluctuations, it's engineered to be safe around children, pets, and everyday household activity. The connector locks securely into your car but releases smoothly when needed—no fumbling, no frustration.

Whether you're coming home from work, running errands, or planning a family road trip, this charger quietly does its job so you can focus on what matters most. It doesn't demand attention—it earns trust through consistent, hassle-free performance.

No learning curve. No hidden fees. No compromises.

Just plug in, walk away, and wake up to a full charge every morning.

Perfect for first-time EV owners. Perfect for busy families. Perfect for everyday life.

EXCELLENT OPERATING TEMPERATURE

The use range of -25°C to 50°C can meet the use of most parts of the world, and has good stability.
