

Portable EV Car Charger with Adjustable Current Output, Universal Compatibility, and 12-Protection Safety Suite

Basic Information

- Brand Name: TIANJIN TOEC HUADIAN TECHNOLOGY CO., LTD
- Model Number: HD-MZAC-9716

Product Specification

- Interface Standard: GB
- Output Current: AC
- Output Power: 3.5 Kw
- Input Voltage: AC 110-240V
- Power: 3.5kw-7kw
- Voltage: 110V AC-240V AC
- Highlight: portable EV car charger with adjustable current, universal EV car charger with safety protection, adjustable current portable EV charger

Product Description

We usually export large quantities to foreign countries. Hope to find more trade partners.

The All-in-One Solution: MZAC-9716 Portable EV Charger for Replace & Repair

When it comes to **reliable EV charger replacement or professional repair jobs**, the **MZAC-9716 Portable EV Charger** stands unrivaled as the most versatile, safe, and customizable solution on the market. Engineered to fit a wide range of vehicles and electrical systems, it delivers flexible power (3.5kW-7kW) and industrial-grade safety, making it the first choice for technicians, fleet managers, and DIY EV owners alike.

Universal Compatibility, Unmatched Flexibility

- **Four Interface Options:** Compatible with Type1, Type2, GB, and Tesla standards—this single charger covers nearly all electric vehicles on the road, eliminating the need for multiple tools.
- **Adjustable Power & Current:** Switch between 16A (3.5kW) and 32A (7kW) output to match your vehicle's needs or electrical capacity.
- **Global Voltage Support:** Works seamlessly with AC 110V-240V input, making it perfect for international use, home replacement, or on-site repair.
- **Customizable Length:** The standard 5m cable ensures ample reach, with fully customizable lengths available to fit any installation or repair scenario.

Smart Operation, Tailored to You

- **1.8" Smart Display:** Monitor charging voltage, current, and status in real time for precise diagnostics and control.
- **Multi-Function Touch Buttons:** Intuitive controls make it easy to adjust settings or program **24-hour scheduled charging** to take advantage of off-peak rates.
- **Customizable Features:** Choose from personalized color options and support for logo customization, allowing for brand alignment or fleet identification.
- **LED Light Bar Indicator:** A bright, visual status bar provides instant feedback on charging progress and errors at a glance.

12 Layers of Ironclad Safety

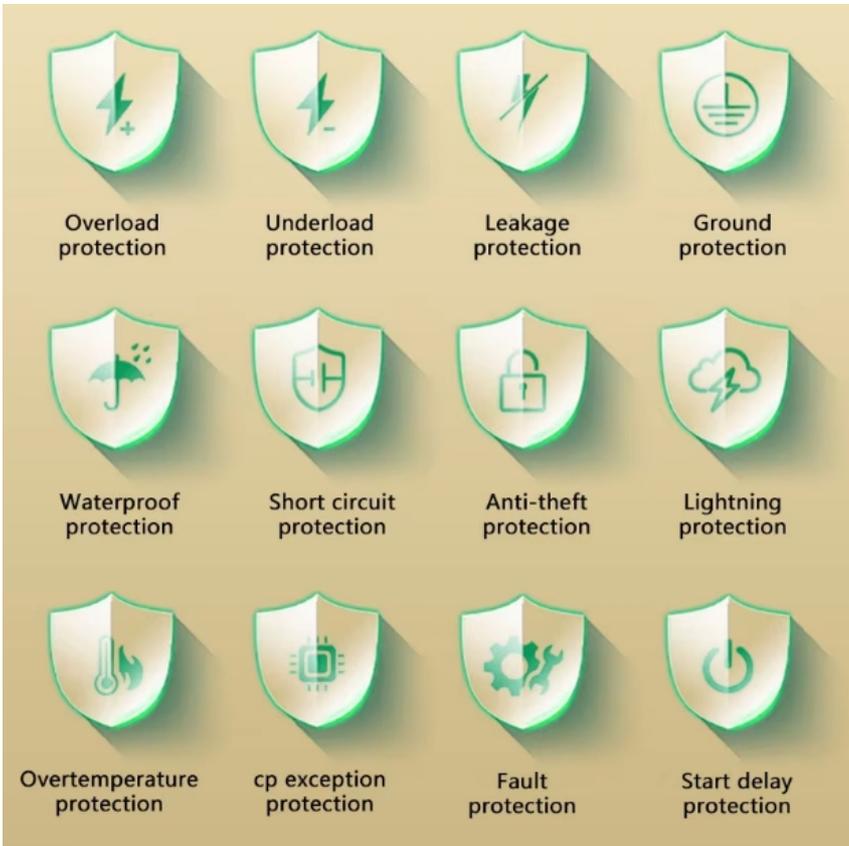

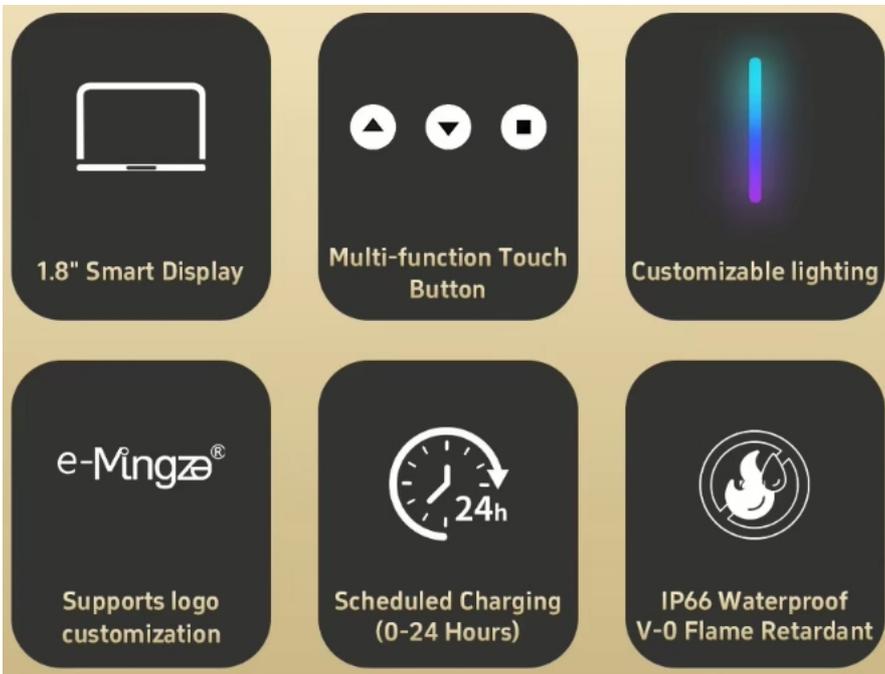

Your peace of mind is our priority, which is why the MZAC-9716 is equipped with a comprehensive 12-protection safety suite:

- **Electrical Protection:** Overload, Underload, Leakage, Ground, Short Circuit, and CP Exception protection.
- **Environmental Protection:** IP66 Waterproof, Lightning, and Overtemperature protection.
- **Functional Protection:** Anti-theft, Fault, and Start Delay protection.
- **V-0 Flame Retardant:** Constructed with flame-retardant materials for added safety in any environment.

Built for Repair, Backed by Warranty

- **New Condition:** Every unit is brand new, ensuring reliable performance for replacement jobs.
- **12-Month Warranty:** We stand behind our product, providing a full year of coverage for professional use.
- **Ideal for Service:** Designed specifically for replace/repair purposes, it's durable enough for the workshop and portable enough for on-site calls.

Don't settle for a one-size-fits-none charger. Choose the MZAC-9716 for a repair and replacement solution that combines universal fit, smart technology, and uncompromising safety.
